FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF SECRETARY

In the Matter of	)	MM Docket No. 94-72
	)	
Amendment to Section 73.202(b)	)	RM-8479
Table of Allotments,	)	
FM Broadcast Stations	)	
(Odessa and Los Ybanez, Texas)	)	
	)	

TO: John A. Karousos,  
Acting Chief, Allocations Branch  
Policy and Rules Division  
Mass Media Bureau

**RESPONSE TO ORDER TO SHOW CAUSE**

Israel Ybanez (hereafter Ybanez), licensee of FM broadcast Station KYMI, Los Ybanez, Texas, hereby responds to the Commission's order to show cause why his license should not be modified to specify operation on Channel 253C2 instead of Channel 300C2. In support thereof, Ybanez respectfully states as follows:<sup>1/</sup>

1. On July 8, 1994, the Acting Chief, Allocation Branch, Policy and Rules Division, Mass Media Bureau, issued a Notice of Proposed Rule Making and Order to Show Cause (DA94-709) looking toward (1) the substitution of Channel 300C1 for Channel 299C2 at Odessa, Texas, and (2) the substitution of Channel 253C2 for Channel 300C2 at Los Ybanez. The rule making proponent, Ruben Velasquez (hereafter Velasquez) is the permittee of FM Station

<sup>1/</sup> The facts and matters relied upon in this response are covered by the annexed Declaration of Larry Ybanez.

024

KADM, which is presently authorized to operate on Channel 299C2 at Odessa.

2. The respondent herein, Israel Ybanez, is the licensee of FM Station KYMI, Los Ybanez. KYMI operates on 107.1 mHz with effective radiated power of 50 KW and height above-average terrain of 459 feet. The station commenced operations in December 1990. It is a family owned and operated facility with a small staff of seven. Israel Ybanez devotes substantial time to station activities without compensation. His son, Larry Ybanez, serves as the station's General Manager.

3. KYMI provides entertainment, religious, agricultural and other programming in the English and Spanish languages. The station has never operated at a profit and Ybanez anticipates that it will be two or three more years before KYMI reaches the break even point.

4. Ybanez objects to the channel substitution at Los Ybanez for the following reasons: first, and foremost, KYMI's present dial position (107.9 mHz) is uncluttered. Listeners know where KYMI is and can easily tune it in. In contrast, the Commission proposes to move the station to approximately the middle of the dial (98.5 mHz) which is already cluttered by the signals of other receivable FM stations in the area. So under the Commission's proposal, Ybanez faces the real prospect of audience diversion simply because of a change in dial location.

5. Second, KADM is already authorized to provide service as a Class C2 station at Odessa. While KADM apparently cannot provide

Odessa with a complete city grade signal, it is able to provide 70 dBu service to 74 percent of the Odessa land area and has been granted a waiver of the community coverage rule (see May 17, 1994, Petition for Rule Making and for Order to Show Cause, p. 2). Thus, the Commission has necessarily concluded that the public interest will be served by operation of KADM as authorized despite its slight (6 percent) shortfall in providing at least 80 percent coverage to Odessa.

6. According to Velasquez, operating as a C1, KADM will provide service to 116,510 persons beyond its presently authorized facilities (Ibid.). Importantly, Velasquez does not assert that these persons are in any respect underserved. Indeed, the Commission's Notice itself reflects that there are presently two Class C1s and one Class C allotment at Odessa and published sources indicate that there are more than 20 radio stations authorized to serve or presently serving Odessa and nearby Midland. Broadcasting & Cable Yearbook 1994, pp. B-368-369 (Appendix A hereto).<sup>2/</sup> In these circumstances, the proposed upgrade can be justified only on the premise that more service is better even to a community and area which receive an abundance of service.

7. Ybanez would, therefore, urge the Commission to leave the channel allotments as is and let KADM go forward with construction and operation as a Class C2 station. If, however, the Commission orders the proposed substitution at Los Ybanez, then, as Velasquez

---

<sup>2/</sup> Odessa and Midland are approximately 20 miles apart.

acknowledges, Velasquez must compensate Ybanez for the reasonable expenses associated by changing channels at Los Ybanez (Notice, ¶2). These expenses will include (i) legal, (ii) engineering, (iii) equipment, (iv) printing, (v) promotion for new frequency, (vi) out-of-pocket nonreducible expenses while KYMI is off-the-air, and (vii) miscellaneous (telephone calls, etc.). FM Table of Assignments (Circleville, Ohio), 8 FCC2d 159, 163-64 (1967). There is annexed hereto as Appendix B the Declaration of Floyd Phillips outlining the likely technical changes which will be required. If the channel substitution is ordered, Ybanez will of course cooperate with Velasquez to come to an understanding or agreement as to reimbursable costs.

WHEREFORE, Ybanez urges the Commission not to substitute Channel 253C2 for Channel 300C2 at Los Ybanez.

Respectfully submitted,

**ISRAEL YBANEZ**

**APPENDIX B**

## DECLARATION

I, Floyd Phillips, hereby declare under penalty of perjury under the laws of the United States of America that the facts and matters recited below are true and correct:

With regard to the proposed change of frequency for Radio Station KYMI in Los Ybanez, Texas, the following observations apply from a purely technical stand point:

It would definitely be necessary to replace the existing FM antenna currently employed by KYMI with a new antenna of similar quality cut to operate at the same frequency. The existing transmission line would be adequate for the frequency change. KYMI also employs a custom made second harmonic notch filter to assist in filtering out TV interference (TVI) to neighbors in the immediate area. On it's initial operation, KYMI performed considerable work at private homes in the area to eliminate TVI. The second harmonic notch would need to be replaced or retuned to the new frequency and TVI problems re-investigated if any should occur.

The transmitter currently employed by KYMI would need to be converted to the new frequency. Usually, this is not a difficult project but in the case of KYMI, the condition of the transmitter will likely necessitate the engagement of factory personnel to attempt to retune the unit. If the transmitter cannot be successfully retuned, then it will need to be replaced.

These would appear to be the major technical items involved, as the STL's, etc. would remain the same.

I am currently Chief Technical Operator for Radio KCRS in Midland, Texas. I obtained my original First Radiotelephone License in 1965, and have been employed in broadcasting in a technical capacity since that time. I have submitted numerous FCC applications, forms, and data both for AM and FM broadcast upgrades, reproofs, and new licensing. I was involved in the early licensing of KYMI and familiar with the facility although I have not been engaged by KYMI for over a year. My current general radiotelephone number is PG-10-7440.

Executed this 25 day of August, 1994.

  
\_\_\_\_\_  
Floyd Phillips

DECLARATION

I, Larry Ybanez, hereby declare under penalty of perjury under the laws of the United States of America that the facts and matters recited below are true and correct:

I am General Manager of FM broadcast station of KYMI, Los Ybanez, Texas. The facts and matters recited in the foregoing response are true and correct.

Executed this 26 day of August, 1994.

  
Larry Ybanez
